RISK AND REWARD PROFILE

Meaning of the risk and reward indicator

The risk indicator aims to provide you a measure of the price movement of the shares. This category 5 means that the share price has a quite high price movement therefore the risk of loss as well as the expected reward can be medium to high. The lowest category does not mean a "risk free" investment.

Historical data may not be a reliable indication for the future. The risk indicator shown is not guaranteed and may change over time. There is no capital guarantee or protection on the value of the Sub-Fund.

Reason why the Sub-Fund is classified in this risk category

The Sub-Fund is in category 5 because it invests exclusively, directly or indirectly, in Equity Securities issued by Iberian companies of any size. These securities are subject to significant price movements due to local market-related factors and other local economic factors.

The following risks may not be fully captured by the risk indicator and may be materially relevant for this Sub-Fund:

Hedged Strategies risk: the risk arising from improper hedging (e.g. when hedging insufficiently reduces the loss of capital or significantly reduces the potential rate of return of the investment hedged).

Liquidity risk: the risk arising when an insufficiency of buyers on the market affects the ability to sell investments.

Further investment risks are set out in the risk section of the prospectus.
